Groupe
REVOLT

Who are we?

With 14 years of expertise in the field, the **Groupe Revolt** supports its clients in their energy transition. Comprising 8 brands and companies, the group aims to become a major player in temporary decarbonized energy in France and abroad. Our objective is to minimize the use of thermal generators by integrating them into our hybrid alternative energy solutions — turnkey and immediately deployable.

Nexa Energy Africa is the leading reference in innovative, temporary, and decarbonized energy solutions.

Thanks to our engineering department, we design solutions that combine performance and environmental responsibility for event agencies, construction professionals, telecommunications operators, and local authorities.

We also develop tailor-made solutions adapted to your specific needs. Our experts work closely with you to create solutions that perfectly meet your technical and environmental requirements.

Our product ranges

Nexa Energy Africa develops three complementary ranges of innovative solutions: The **Hybrid E-Power** range, a complete solution combining photovoltaic production and energy storage, ideal for **temporary self-consumption** and reducing dependence on thermal generators. The **E-Power** range, offering **mobile and modular energy** storage systems designed to power your installations silently and without greenhouse gas emissions. The **solar** range, providing autonomous, easy-to-deploy solar frames for **instant clean energy production**.
